

Exercise 4a

Your Name

Last modified: 22 Dec 2016

Import the ozone dataset into R

```
weather <- read.csv("ozone.csv")
```

scatter plot two variables. e.g. Solar Radiation against Ozone

```
plot(weather$Solar.R, weather$Ozone)
```

a histogram. e.g. Wind Speed

```
hist(weather$Wind)
```

boxplot of a continuous variable against a categorical variable.
e.g. Ozone level per month

```
boxplot(weather$Ozone ~ weather$Month)
```
